

**Cleaning policies:**

We ask customers to do a light spraying off of equipment at their job site before returning equipment. Large equipment like a walk-behind skidsteer, skidsteer or tillers can get large dirt chunks stuck in their treads or tines. We ask customers to spray off the excess material before returning. For items that have a resale collection bag like a concrete vacuum, we ask that you remove the bag and dispose of it at your job site. Additional cleaning fees may apply.
