

Fueling policies:

For small engine machines, the first tank of fuel is on us. You do not need to return the machine full.

With machines that require an oil/gas mixture, we will send extra fuel along with you and ask that you only fill the machine with what we provide.

For larger equipment, we do ask that you refill them. Larger equipment includes our vehicles, skidsteer and mini skidsteer units, excavators, and more. There will be a line-item on the contract notifying you to refill the unit. There should be a sticker on the unit requesting the customer to refill it, and what kind of fuel the unit takes. We do charge an additional fueling fee if you do not return the unit full.
